PAINT A ROOM FOR UNDER \$99[‡]

STEP 1: Patch & Prep

CHECKLIST

Remove electrical plates, then check your walls for cracks or holes. Remove any loose material and fill the holes with Polyfilla. Allow to dry and sand smooth with a sponge sander. Protect areas that won't be painted with drop sheets and by applying painter's masking tape.

STEP 2: Prime

CHECKLIST

Use Kilz 2 Latex Primer to prevent any bleeding of stains through your topcoat and to ensure a uniform result, spot prime small patches by brush or roll out large areas to seal the filled repairs. Ask a Paint Associate to tint your primer to blend with your chosen finish colour.

STEP 3: Paint

CHECKLIST

Start with a brush by cutting in the corners, ceiling and around baseboards and door and window trim. Then use a roller in W patterns, spreading paint to fill in the pattern. Work in small sections so the paint doesn't begin to dry before you've filled the section. Backroll wet paint from floor to ceiling to blend and finish each section. Allow four hours drying time before applying a second coat. Dries to the touch in two hours.
