

IMPORTANT SAFETY RECALL NOTICE

RIDGID 18V BRUSHLESS 21-DEGREE AND 30-DEGREE FRAMING NAILERS DUE TO LACERATION HAZARD

The dual action engagement system on the nailers can malfunction and involuntarily discharge a nail by pulling the trigger alone, posing a laceration hazard to consumers. The nailer should require both the work piece contact element (nose-piece) to be depressed and the trigger to be pulled at the same time in order to discharge a nail.
